

Winter Shipping Procedures - Are you ready?

Seasonal winter weather is already here! To assure that shipments are handled appropriately and with timely delivery service, we want to remind you of important winter shipping information. The following shipping guidelines are for CSI's conventional products only as the seasonal winter weather does *not* impact CSI's ultra-concentrated products.

Benefits of CSI's ultra-concentrated products:

CSI's conventional products have been tested to withstand multiple freeze/thaw processes without hurting performance. However, because it contains a higher percentage of water than our ultra-concentrated, it is more susceptible to freezing and once frozen more difficult to thaw and put back into suspension.

This is why we have yearly Winter Shipping Procedures.

- Designed to successfully-withstand the multiple freeze/thaw processes and have no adverse product performance.
- The double walled corrugated packaging further protects the product from freezing.
- If the product does arrive frozen, just thaw the product and shake into solution before use.

Thus, if you typically have issues with your products in winter, this may be a good time to switch! **[Visit product details on Website](#)**

System

Tips to avoid unexpected delays:

Since less than truckload (LTL) shipments typically transfer at multiple freight terminals, the potential for unexpected delays is always present and becomes a greater concern during the winter shipping season. Proper inventory management and ordering early is the best way to safeguard against running low on product. It is also more cost effective to stock up with larger orders that are eligible for quantity discounted pricing and free freight.

As a reminder, shipping guidelines are for CSI's conventional products:

- If the temperature drops to 10° F, or is predicted to do so, most shipping companies will not pick up LTL shipments marked "Do Not Freeze" since they would be liable for any resulting claims.
- Orders for stock items should be placed the week prior to shipping since some freight companies only pick up Mon-Wed to avoid the possibility of shipments freezing over the weekend.
- Orders for non-stock and special-order items should be placed well in advance to avoid possible delays.

Note: This is only a guideline as unforeseen weather conditions may impact shipping schedules.

Please be aware that between Christmas and New Year's there is limited LTL shipping. Full truckloads will be relatively unaffected. Our recommended order date for product to deliver before Christmas is **Monday, December 2nd**.

As per the standard receiving protocol, it is critical to:

- Carefully inspect all shipments prior to signing the freight bill, verifying that the shipment is complete, and not visibly frozen or damaged in any way.
- Note any identified issues on the freight bill*.

* Without the details, CSI cannot be responsible if a problem occurs as we have no recourse with the carrier.

**We appreciate your business and wish you
a successful winter washing season!**

During this holiday season, CSI will be **closed** on the following dates:

Thanksgiving

Thursday, November 28th & Friday, November 29th

Christmas

Tuesday, December 24th & Wednesday, December 25th

New Year's Day

Wednesday, January 1st
